IDENTIFIERS	*Indiana Vocational Technical College

ABSTRACT

A 1992 Indiana law required public institutions of higher education to jointly identify at least 30 semester credit hours of comparable general education (GE) courses fulfilling graduation requirements at each institution. Ten, 3-hour GE courses were identified and found to transfer among all of the state's institutions except the Indiana Vocational Technical College (IVTC) system. As of 1996, one of the ten courses was not offered in the system, although seven of the remaining nine courses were regularly taught in all or most of the IVTC campuses. With respect to the transferability of these courses to state four-year colleges, all except for two Indiana University (IU) campuses accepted transfer credit for seven or more of the nine mandated courses offered by IVTC. In addition to the nine mandated courses, IVTC offered 29 other GE courses bearing credit and counting toward graduation requirements; however, seven public campuses accepted only one or none of these GE courses. Finally, with respect to the transfer of IVTC associate degree programs, 13 programs transferred 50% or more of their credits to a related baccalaureate degree, while 30 program transfer understandings were in place with four-year institutions. Appendixes, comprising the bulk of the report, provide a list of GE courses offered at IVTC; a table of campuses that accept credit for each IVTC GE course; and a table of IVTC program transferability, showing the percentages of credits transferring and institutions accepting credits for each program. Introduction

The balance of this report is divided into three parts: transfer of Ivy Tech general education coursework, transfer of Ivy Tech technical coursework in the context of program transfer understandings, and conclusions. Much of the data reported in parts one and two derive from information gathered by staff of Ivy Tech State College and verified by the other public institutions (see Appendix B for information supplied by Ivy Tech on general education course transfer and Appendix C for information supplied by Ivy Tech on program transfer understandings). The progress report has been developed in response to Public Law 19-1992 (see below) and as part of the scope of activity envisioned in the original workplan of the project on two-year instructional opportunities.

Part I - General Education Coursework

Mandated Courses

Public Law (P.L.) 19 from the Acts of 1992 mandates that "the public institutions shall jointly identify at least thirty (30) semester credit hours of comparable general education courses that are eligible to be earned by students to fulfill graduation requirements at each state educational institution." Soon after passage of the legislation, the seven public institutions identified ten, three-semester hour general education courses that were intended to fulfill the mandate of P.L. 19-1992.

The Commission discussed progress reports on fulfilling the mandate of P.L. 19-1992 on two previous occasions -- February 1994 and February 1995. The 1994 progress report confirmed that the ten, three-hour courses (totaling 30 semester hours) identified by the institutions in fulfillment of the P.L. 19-1992 mandate did, in fact, transfer among all public institutions, with the exception of Ivy Tech.

Of the ten courses, nine are now regularly taught at Ivy Tech, and one is not (see Table 1). Philosophy I has never been and is not currently being taught by Ivy Tech in any of its 13 regions, although the course appears in the list of general education courses identified in the 1994-96 College catalog. Seven of the nine mandated courses are regularly taught in all or most Ivy Tech regions. Two of the nine courses -- American Government I and American History I -- are regularly taught, but only in some Ivy Tech regional campuses.

Table 1

MANDATED GENERAL EDUCATION COURSES
TAUGHT BY IVY TECH STATE COLLEGE

Discipline Area	Course Title*	Frequency of Course Offering	ITSC Regions Offering Course
Communications	English Composition I	Regularly	All or Most
	English Composition II	Regularly	All or Most
	Speech I	Regularly	All or Most
Social Sciences	American Government I	Regularly	Some
	American History I	Regularly	Some
	Psychology I	Regularly	All or Most
	Sociology I	Regularly	All or Most
Humanities	Philosophy I	Never	None
Life and Physical Sciences	Biology I	Regularly	All or Most
Other**	Computer Literacy I	Regularly	All or Most

* For the sake of simplicity, generic course titles, e.g. "English Composition I," are used to refer to mandated general education courses rather than the actual course number and title, e.g. ENG 111, "English Composition: Strategies for Inquiry," that is found in the Ivy Tech catalog. See Appendix A for the course numbers and titles as they appear in the Ivy Tech catalog.

** At Ivy Tech, Computer Literacy I is technically a Computer Science course, not a general education course.

Transfer of Mandated Courses

This section of the progress report focuses attention on the extent to which the nine mandated courses that are regularly taught by Ivy Tech transfer to the other public institutions.

Number of Courses Transferring

With two exceptions, all public campuses will transfer credit for at least seven of the nine mandated general education courses regularly taught by Ivy Tech (see Table 2). In fact, four, four-year campuses (IU-South Bend, IUPU-Fort Wayne, Indiana State University, and the University of Southern Indiana), along with Vincennes University, will transfer credit for all nine of these regularly taught mandated general education courses. Two other university campuses (IU-Kokomo and Ball State University) will transfer credit for eight of the nine courses. In some Ivy Tech regions, only seven or eight of the nine mandated general education courses are taught, and this may explain why not all nine of the courses are accepted by the local university campus.

The two campuses that are exceptions -- IU-Bloomington and IU-Southeast -- transfer relatively few of the nine mandated general education courses (four and three courses, respectively).

This year, about one-half of the public campuses accept at least one more Ivy Tech general education course for transfer than last year. Three, four-year campuses (IU-South Bend, IUPU-Fort Wayne, and Ball State University) accept three more of the mandated general education courses in 1996 than in 1995; IUPUI accepts two more of these courses.

Statewide Transfer in Most Cases

In most cases, public institutions transfer Ivy Tech credit for mandated general education courses taught anywhere in the Ivy Tech system. For example, if a student takes English Composition I at Ivy Tech-Gary, that student may transfer credit for the course to Indiana State University, assuming the student achieved a sufficiently high grade in the course. The statewide approach to transfer of credit is taken by Purdue University, Indiana State University, the University of Southern Indiana, and Vincennes University.

Ball State's Modified Statewide Transfer Approach

Ball State University will accept credit for courses taken at any other Ivy Tech campus in the state, provided the local public university has agreed to accept credit for those courses. For example, if a student takes English Composition I at Ivy Tech-Gary, that student may transfer credit for the course to Ball State, since IU-Northwest and Purdue-Calumet have agreed to transfer credit for that Ivy Tech course.

Shading indicates a change from 1995 to 1996.

Indiana University's Approach

Indiana University's position with respect to transfer of Ivy Tech general education credit may be summarized by two statements that were included in the material provided by the University last year:

1. "Each Indiana University campus has entered [into] agreements with particular IVTC [ITSC] campuses for transfer of credit."

2. "Any credit accepted as part of a local agreement is also accepted at all the other IU campuses."

The following example is provided to illustrate how the two principles work together. Under the first principle, IU-Northwest has reached an agreement with ITSC-Gary

whereby IU-Northwest will accept for transfer the credit earned by a student who takes Biology I at the Gary campus of ITSC. By virtue of the second principle, the ITSC-Gary student can then transfer the credit for Biology I to IU-Bloomington. However, a student who takes Biology I at ITSC-Columbus cannot transfer the credit earned for that course to IU-Bloomington because IU-Bloomington and ITSC-Columbus do not presently have a transfer agreement for Biology I.

Indiana University and the Ivy Tech are continuing their discussions about transfer of credit, and the University expects that eventually transfer agreements will be reached between each IU campus and the local ITSC campus regarding all nine of the mandated general education courses regularly taught by Ivy Tech.

After these agreements have been reached, Indiana University will then turn attention to developing a mechanism by which general education courses taught in ITSC regions that are not proximate to an IU campus (Lafayette, Muncie, Terre Haute, Madison, and Evansville) can transfer, since these ITSC campuses are not included in the agreements that have been reached thus far. In the case of IUPUI, this has already happened to some extent: IUPUI has agreed to accept any general education course that Purdue University-West Lafayette accepts for transfer.

Transfer of Other General Education Courses

In addition to the nine mandated general education courses, Ivy Tech teaches, according its 1994-1996 College Catalog, a total of 29 other general education courses that bear credit and that count toward meeting requirements for associate degrees offered by the College (see Table 3). Excluded from the 29 courses are 21 basic skills advancement courses (e.g. English as a Second Language, Spelling, Reading Strategies for College, College Success Skills, Keyboarding) listed in the 1994-1996 College Catalog, whose credit does not count toward meeting degree requirements.

Of the 29 courses, two are in communications, six in the social science, three in the humanities, eight in mathematics, and ten in the life and physical sciences. Most of these courses are taught regularly and are offered in all or most Ivy Tech regions.

The extent to which the 29 other general education courses transfer to public four-year institutions varies dramatically (see Table 4). Each of the four Purdue campuses transfers 20 of these 29 courses. IU-Northwest accepts 18 of the 29 courses for transfer, and IUPUI accepts 13 courses, whereas IU-Southeast transfers credit for only one course, and the remaining four Indiana University campuses transfer none of the 29 courses. Indiana State University and the University of Southern Indiana transfer 15 and ten of 29 courses, respectively, while Ball State University transfers only one of the 29, and Vincennes University none.

Summary of General Education Transfer

Ivy Tech State College teaches a total of 38 general education courses (nine mandated, including Computer Literacy I, and 29 other courses). Eight public, four-year campuses transfer 19 or one-half of the 38 general education courses offered by Ivy Tech, while seven campuses transfer nine or less of these courses (see Table 5). Purdue campuses transfer the most number of Ivy Tech general education courses: IPFW transfers a total of 31 courses, while each of the other three Purdue campuses transfers 27 general education courses. IU-Bloomington and IU-Southeast transfer the fewest Ivy Tech general education courses -- four each.

Vincennes University	9	0	9

Part II - Program Transfer Understandings

The term "program transfer understanding" refers to the understanding that a two-year and a four-year campus have with respect to the number of semester credit hours that a graduate of an associate degree program offered by the two-year institution can transfer to a baccalaureate degree program at the four-year institution. For purposes of this progress report, it does not matter if the credits transferred into the baccalaureate degree program result from a formal program-to-program articulation agreement or from a course-by-course agreement that applies irrespective of what the program the associate degree graduate completed.

Ivy Tech reports that 13 different kinds of associate degree programs transfer 50 percent or more of their credits to a related baccalaureate degree (see Table 6). Five of the thirteen kinds of associate degree programs are health-related (nursing, occupational therapy assisting, paramedic science, radiologic technology, and respiratory care), three are business-related (administrative office technology, business administration, and computer information systems), and three others are related to technology (design technology, electronics technology, and manufacturing technology).

Of the thirteen fields, the one that has by far the most number of program transfer understandings is nursing. In that field, a total of eight public, four-year campuses -- including six of the Indiana University campuses by virtue of a systemwide School of Nursing policy -- will transfer 50 percent or more of credits to the baccalaureate degree in nursing.

In place now are a total of 30 program transfer understandings. Twenty-one, or more than two-thirds of the total, result in 75-100 percent of the credits earned in the associate degree transferring to a baccalaureate degree (see Table 7). The Indiana University system by itself accounts for fifteen or one-half of the 30 program transfer understandings currently in place.

IUPUI has six program transfer understandings with Ivy Tech -- more than any other public four-year campus (see Table 8). The Purdue-Calumet campus has five program transfer understandings with Ivy Tech, followed by IU Northwest, Indiana State University, and the University of Southern Indiana, each of which have four program transfer understandings. All other public campuses has either one or zero program transfer understandings with Ivy Tech, with the exception of IU South Bend, which has two.

In the case of the smaller regional campuses -- e.g. IU East and Purdue-North Central -- it should be pointed out that because of the limited number of baccalaureate degrees authorized for these campuses (eleven and six, respectively), there is an obvious upper limit to the number of program transfer understandings that could potentially be worked out with Ivy Tech.

Shading indicates a change from 1995 to 1996.

Conclusions

1. Four years after P.L. 19-1992 was passed, all public campuses except IU-Bloomington and IU-Southeast will transfer credit for seven or more of the nine general education courses taught regularly by Ivy Tech State College, as mandated by state law.

2. Public campuses vary dramatically with respect to the number of other general education courses taught by Ivy Tech that will transfer credit: the number ranges from 22 to zero.

3. Six public campuses -- all four Purdue campuses, IU-Northwest, and Indiana State University -- will transfer one-half or more of the 29 other general education courses taught by Ivy Tech State College.

4. Seven public campuses -- five Indiana University campuses, Ball State University, and Vincennes University -- will transfer only one or none of the 29 other general education courses taught by Ivy Tech.

5. A very small number of Ivy Tech associate degree programs (30) will transfer 50 percent or more credit to baccalaureate degree programs offered by public institutions; this number:

   a) Represents some progress since 1987, when no Ivy Tech associate degree programs transferred credit to public institutions; but

   b) Represents little progress since last year, since only five more programs -- 30 in 1996 versus 25 in 1995 -- transfer 50 percent or more of their credits to public universities.

6. The Indiana University system accounts for one-half of the 30 program transfer understandings currently in place.

7. The IUPUI and Purdue-Calumet campuses have the most program transfer understandings with Ivy Tech (six and five, respectively), followed by IU Northwest, Indiana State University, and the University of Southern Indiana with four each.
